PERSONAL PROFILE

Computer Science graduate with First-Class Honors from Covenant University, with practical experience in software development, database management, and IT systems support. Proficient in multiple programming languages and skilled in troubleshooting technical issues and working with data-driven applications. Strong analytical thinker with a growing interest in cybersecurity, artificial intelligence, and building secure and efficient digital solutions.

WORK EXPERIENCE

From June 2025 – February 2026 Software Development Intern

Autogon AI

- Designed and populated structured database tables with realistic financial transaction data using Python and Faker to support internal system simulations.
- Developed and executed MySQL scripts to create and populate relational databases, ensuring data consistency and proper schema implementation.
- Assisted in documenting platform modules, system workflows, and product features to support technical understanding and future development.
- Collaborated with developers and supervisors to troubleshoot technical issues, optimize database performance, and improve system documentation.

Autogon AI is a technology company focused on building intelligent software solutions, including AI-driven systems, backend infrastructure, and financial technology platforms designed to improve digital operations and data processing.

From May 2023 – August 2023 Tech Intern

Nigerian Breweries Plc, Ogun State, Nigeria

- Diagnosed and resolved networking issues across the company, improving system uptime and reducing downtime by 30% to support continuous operations.
- Acted as a trusted problem-solver for technical issues, contributing to a 25% increase in staff productivity through timely IT support.
- Delivered proactive solutions and recommendations to supervisors, demonstrating independent thinking and innovation within IT support.
- Led and guided a team of interns, improving team efficiency by coordinating tasks and providing mentorship.
- Supervised two interns and contributed to a three-person team tasked with developing innovations to improve employee engagement and company productivity.

Nigerian Breweries Plc is the largest brewing company in Nigeria, producing and distributing a wide range of alcoholic and non-alcoholic beverages. Established in 1946, the company operates multiple breweries across Nigeria and is a subsidiary of Heineken International.

EDUCATION AND TRAINING

Covenant University, Ota, Ogun State, Nigeria

From January 2021 – October 2024 Bachelor of Science (B.Sc.) in Computer Science

Thesis on “Micro-Credentialing in Online Security and Digital Literacy in Primary Education”

CGPA - 4.60 / 5.0 (First Class).

Saint Francis Catholic Secondary School, Idimu, Lagos State, Nigeria

From September 2014 – November 2020 Senior School Certificate (SSCE)

WAEC - 3A'S and 6B's

JAMB - 284 / 400 (Maths, English, Biology, Physics)

SKILLS

Technical Skills

- Python, Java, C++, C, C#, JavaScript
- HTML, CSS
- MySQL, SQL
- .NET Framework, Visual Studio
- Python (Faker) for data generation
- Networking and Cybersecurity fundamentals
- System troubleshooting and IT support
- Technical documentation

Soft Skills

- Analytical and problem-solving skills
 - Teamwork and collaboration
 - Communication and technical explanation
 - Leadership and mentorship
 - Time management and organization
 - Attention to detail
-

CERTIFICATES

- Object-Oriented Data Structures in C++ – Coursera
 - Fundamentals of Network Communication – Coursera
 - Introduction to Cybersecurity – Cisco Networking Academy
-

PROJECTS

- Developed a windows desktop application with visual studio
- Integrated development environment, .net framework (c#) and mysql database which serves as a medicine prescription management system
- Micro-credentialing in online security and digital literacy in primary education with gamification
